

Ogre::FrameListener

```
classDiagram
    class OgreBites_ApplicationContextBase["OgreBites::ApplicationContextBase"]
    class Ogre_FrameListener["Ogre::FrameListener"]
    OgreBites_ApplicationContextBase --|> Ogre_FrameListener
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded box labeled 'OgreBites::ApplicationContextBase'. A blue arrow points vertically upwards from the center of this box to the center of a white box labeled 'Ogre::FrameListener' positioned above it. This indicates that 'OgreBites::ApplicationContextBase' inherits from 'Ogre::FrameListener'.

OgreBites::ApplicationContextBase
